LETTERS TO THE EDITOR

Dear Mr. Editor:

I read with interest the reference you made to Bibles in your page column. I, too, have a good number of Bibles, about 15. Among these is The New Testament in Greek, and a Topical Bible with every verse classified by its content or subject material. This unusual volume was printed in 1896. It is very handy, for the subjects are listed alphabetically — for instance, if one wants to read what the Bible says about Prayer he can turn to the P's and under the title "Prayer" find every verse on the subject, all ready to read.

The convenience we enjoy in Bible study is truly wonderful. Most people own one or more Bibles. Most people realize that the Bible is a sacred source of comfort, truth and instruction. It is a miracle book that has stood through the ages in spite of every effort to destroy it. Its prophecy has proved miraculous. It is a wonderful book for the future to be inspiration for today's art, music, quoted as the divine peculiar as well as wisdom. And yet, Mr. that most of us h less possession tha homes. The coming Christmas daily Bible sponsored by the Society would give to join the thous lic in getting hold with "God's Word" Sincer

Pasture Stand

dressing of fertilizer pasture stands in top- ion, says John F. pasture agronomist at

He points out that with the good growing season just past in most parts of the state, much of the available plant food in the soil has been used. So topdressing is an important job this season if pastures are to remain in good condition.

He reminds farmers that the first essential factor in maintaining a productive pasture is to keep the pH between 6 and 6.5. Have the soil tested, and apply lime as it is needed.

Ladino clover-orchard grass or ladino clover-fescue mixtures should be topdressed with 400 to 800 pounds per acre of 0-14-14, 2-12-12 or from 200 to 600 pounds of 0-20-20 fertilizer, or the equivalent. If the pasture has been closely grazed, 5-10-10, 4-12-12, or 10-20-20 may be substituted. If the potash level is low, 0-10-20 may be desirable.

Orchard grass - lespedeza pastures should be topdressed with 300 to 600 pounds per acre of 5-10-10 or from 150 to 250 pounds of 10-20, or equivelent, in late winter or in early spring.

Bluegrass - white clover or natural grass - legume pastures should be topdressed every 3 to 4 years with 700 to 1,000 pounds of 0-20-10, or 900 to 1,400 pounds of 0-14-14, or equivelent. If you want to topdress each year, use 200 to 400 pounds instead of the higher rate.

If no fertilizer has been applied, or if the pasture is badly run down, still has half a stand, or if re-seeding is not to be considered, topdress with a complete fertilizer each year until a good stand comes back. Lime is necessary, use 400 to 500 pounds of a 10-20-20 or 800 to 1,000 pounds of 5-10-10 or equivalent each year until the pasture is in good condition, then topdress as outlined for blue grass and white clover pasture.

LEGION AUXILIARY SUPPORTS PROJECTS

At a business meeting of the American Legion Auxiliary Unit 104 Monday night, the members voted to contribute $25.00 toward uniforms for the Appomattox High School Band. It also made a contribution to the President's Project Department of Virginia. This year, Mrs. William T. Coyner, of Waynesboro has chosen for her project, that of placing a Hi-Fidelity set with proper amplifiers at the Virginia School for the Deaf and Blind in Staunton, and members of the local unit are proud to have a small part in such a fine project.

All past presidents were asked to make a personal contribution toward the project of the Department Past Presidents Parley Chairman, that of putting an automatic washing machine at McGuire Hospital in Richmond for use by the women patients there who are required to launder their own clothes. Another of her projects is to send material to Roanoke Veterans Hospital for the women patients there so that they may sew and make their own clothing, which is good therapy for them.

Appomattox Band Plays In Lynchburg Saturday
